

Job Title: Web Developer – .Net, Mobile (Web and iOS Apps)

Location: Marlow, Buckinghamshire
Salary: 16k-18k dependent upon experience (plus benefits)
Job Type: Permanent

Background

Computers in Personnel are a leading SaaS provider and developer of software for the HR software and systems market, with a growing client base, over one million software users and over 1000 systems implemented. Based in the Thames Valley the company is expanding its on-shore software design and development team and requires a self motivated and progressive individual to work on software design and development projects and to work with our off shore team to expand the capability of our product and service offerings.

Role

The successful candidate will need good C#, ASP.NET and SQL skills and will be responsible for developing & designing highly technical solutions and product offerings using C#, ASP.NET, SQL, XML and Javascript. The company is also growing its mobile product offerings and this is a great opportunity to also get involved in and increase your skills in mobile App (iOS / Android) and mobile web development.

You will be using the very latest in cutting edge technology, within an innovative and agile team. This is an excellent career opportunity and you will have the opportunity to develop your career into more senior developer or team leading roles if you want. The position may require occasional visits to our offshore development centre in India.

Skills

To qualify, your CV will need to demonstrate the following:

- Demonstrable practical or educational exposure to .NET and SQL.
- The ability to solve challenges in a number of different web technologies.
- A strong desire to learn.

The role requires good communication skills and you will be a good team worker but able to use your initiative and work effectively, at times, with minimum supervision.

It is desirable that you have knowledge of standards based development - MVC, Object Orientated, nTier and also any iPhone / iPad development that you have done will strengthen your application. Additionally, experience of Agile methodologies, especially Scrum will be an asset.

Good research, analytical, interpretative and problem solving skills are also essential. You should be able to demonstrate and discuss projects that you have been involved in to show the depths of your ability.

This is an excellent opportunity for a talented, analytical, reliable and self motivated .NET Developer to move their career forward within a highly successful organisation. Joining a team of talented and enthusiastic people expect a great working environment, superb benefits and lots more. Get in touch.
